

## Mailbox Collect

**Outback Property Solutions provides cost-effective practical solutions for the Central West of Queensland.**

Mailbox Collect alerts when there is mail in your mailbox to collect.

The Mailbox Collect is a smart switch located within your mailbox.

Mailbox Collect transmits data to the OPS web Portal using the OPS Communications Network.

Mailbox Collect will send a message or an email when the smart switch is moved to the “Mail to Collect” position.

The smart switch is then moved to the “Mailbox Empty” position when the mailbox is cleared.

Mailbox Collect is a robust solution designed for the Outback.

### **Mailbox Collect . . .**

- alerts when the mail has been delivered.
- ensures the mail is collected from the mailbox at the earliest.
- saves unnecessary driving to the mailbox.
